EDUCATION

University of Toronto, Toronto, ON — Expected June 2028
Bachelor of Science – Computer Science, Astronomy and Astrophysics and Math

- **GPA:** 3.45/4.0
- **Awards:** Dean's Honor List (2024-2025), International Merit Award – $50,000 (2024)
- **Relevant Coursework:** CSC148 – Intro to CS (OOP, Data Structures, Recursion), CSC207 – Software Design (APIs, Git, Clean Architecture), MAT137 – Calculus with Proofs

PROFESSIONAL EXPERIENCE

First Technology KZN Pty Ltd, Durban, South Africa — May 2025 – Aug 2025
EMS Intern – IT Infrastructure & Systems

- Administered O365 and Azure Active Directory environments, supporting enterprise-scale identity and access management for large client deployments across multiple regions.
- Triaged and resolved IT service desk tickets, performing first-line troubleshooting and escalation to maintain SLA compliance and high customer satisfaction scores.
- Oversaw fibre cable infrastructure rollout across 700+ retail stores, coordinating vendor permissions and liaising with field engineers to deliver the project on schedule.

Malvern Child and Youth Care Centre, Johannesburg, South Africa — Jan 2023 – Aug 2023
Academic Tutor – STEM

- Delivered personalized one-on-one and group tutoring sessions in Mathematics, Physics, and Chemistry to high school students, designing targeted study strategies that measurably improved test scores.
- Built strong mentorship and communication skills through weekly sessions, reinforcing complex STEM concepts using logical reasoning frameworks adapted to each student's learning style.
- Demonstrated reliability and initiative by consistently preparing structured lesson plans and tracking student progress over an 8-month engagement.

OTHER ACTIVITIES & SKILLS

Participant – AI/Cybersecurity Track, GenAI Genesis Hackathon 2025 — January 2025

- Developed Argus, an AI-powered Anti-Money Laundering system leveraging Graph Neural Networks (GNNs) to detect suspicious financial transaction patterns with high accuracy.
- Integrated Generative AI components to produce explainable alerts, improving analyst efficiency and reducing false positive review time; delivered a functional prototype end-to-end within the hackathon timeframe.

CSC207 Software Design – Animal Encyclopedia App, University of Toronto — 2024 – 2025

Course Project | Team Lead

- Led a team of 5 to design and ship a full-stack Animal Encyclopedia application using Clean Architecture principles, REST APIs, Git, and OOP best practices as part of a university software design course.
- Coordinated sprint planning, code reviews, and integration testing across the team, demonstrating ownership and initiative well beyond the scope of assigned tasks

Creator & Lead Developer, H.A.D.E.S. – Personal AI Assistant (Personal Project) — 2025 – Present

- Architecting a JARVIS-inspired personal AI assistant capable of natural language understanding, task automation, and contextual decision-making, integrating large language models with real-time system control.
- Designing a modular pipeline with voice recognition, API orchestration, and memory management to enable persistent, multi-session intelligent interactions using OOP and clean architecture principles.

Performing Member & Multi-Sport Athlete

- Performed at Junoon Dance Club (University of Toronto), competed on the school basketball team, and played multi-sport activities including padel, badminton, soccer, and cricket.

Astronomy Representative, University of Toronto — Sep 2024 – Present

- Point of contact for students to raise concerns or comments with the Astronomy and Astrophysics Department.

Technical Skills: Java, Python, SQL, Git/GitHub, REST APIs, OOP, Data Structures, Active Directory, Azure AD, O365 Administration, Graph Neural Networks (GNNs), Generative AI, Network Troubleshooting

Interests: Artificial Intelligence, Cybersecurity, Software Engineering, Astronomy & Astrophysics, Basketball, Padel, Badminton, Dance
